

See the possibilities™

Inviting Embedded Gurus to steer the Automobile Revolution towards the Future.

Welcome to Visteon, where we redefine the Automobile World through an interesting array of automotive components & systems. Our innovative products include cruise control, voice controlled navigation systems, satellite digital audio, and finger print identification systems. Our clientele includes the 19 largest vehicle manufacturers in the world. And recognition has come from legends like Chrysler, Ford, Toyota, GM & Volkswagen. Visteon Software Operations located in downtown Chennai, has been assessed at Level 4 of SEI-CMM. We have exciting openings at our state-of-the-art facility at **Chennai**.

**Software Engineer -
Development / Validation** - Job Code: VSDV
(2+ years in Embedded Software)

Essential skills: • Programming in C & Assembly language for embedded systems • Experience with 8/16/32 bit micro-controllers • Experience with embedded software development tools like emulators, debuggers, simulators & programmers • Software engineering processes • Software Validation of Embedded Systems.

Desired skills: One or more of the following: • Experience with PowerPC, ARM Core, Star 12 • RTOS like PRO OSEK, QNX, SSX5 • Protocol Stack Development, Blue tooth • DSP for automotive applications • Experience in CAN, I2C, J1850, KLINE, KWP2000, LIN, MOST, SPI

• Control system & Human Machine Interface development using Matlab / Simulink / Stateflow • Hardware in the loop simulation using dSPACE • UML based development • Experience in automotive domains like Driver Information / Multimedia / Telematics / Powertrain / Climate Control / Chassis Electronics / Body Electronics.

**Senior Project Lead -
Program Management** - Job Code: VSPM
(6+ years in Embedded Software)

In addition to the Essential & Desired skills indicated above, you must also have experience in: • Managing process compliance and implementation of process improvement initiatives • Mentoring and assisting engineers on process compliance and audits • Leading project tracking and oversight meetings • Identifying & managing program risks • Estimates of effort and ensuring compliance to the release process

Qualification for all positions: Min. Bachelor's degree in Electrical / Electronics / Communication Engineering / Computer Science / Instrumentation, or Master's in Electronic Science. Pass outs of 2004 in the above-mentioned disciplines from reputed institutes may apply. Please indicate "Fresher" in the subject of the mail.

Interviews will be held in all the major cities.
Those who have applied in the past 6 months, need not re-apply.

Please send your resume indicating the job code, to:
vsresume@visteon.com Or to:
Visteon Software Operations, Attn: Manager - HR,
4th Floor, Ispahani Centre, 123/124,
Nungambakkam High Road, Chennai - 600 034.
